

# MEDICAID PUTTING NEW YORK CHILDREN ON A PATH TO SUCCESS

Medicaid and Child Health Plus (CHPlus) (CHIP) provide health insurance for New York children; bring federal dollars into the state; and help children grow into healthy, productive adults.

## PROVIDING HEALTH INSURANCE FOR NEW YORK CHILDREN AND FAMILIES

Children make up **38%** of New York residents covered by Medicaid and CHPlus.

This equals **2,504,152** New York children, including:

- 100%** of children in foster care
- 84%** of children who live in or near poverty
- 51%** of children born to moms covered by Medicaid
- 50%** of children with disabilities or special health care needs such as diabetes and asthma
- 45%** of infants, toddlers, and preschoolers

### WHERE MEDICAID FITS IN: CHILDREN'S COVERAGE IN NEW YORK

## HELPING CHILDREN SUCCEED IN SCHOOL AND LIFE

### CHILDREN WITH MEDICAID

MISS LESS SCHOOL

DO BETTER IN SCHOOL

GRADUATE AND ATTEND COLLEGE

BECOME HEALTHIER ADULTS

EARN HIGHER WAGES

PAY MORE IN TAXES

## ENSURING HEALTHY DEVELOPMENT FROM THE START

Medicaid guarantees access to care for children through its **Early and Periodic Screening, Diagnostic and Treatment** benefit, known as **EPSDT**.

EPSDT is one of the best ways Medicaid helps vulnerable children stay healthy and on track with their peers. It:

- ✓ Identifies problems **early**
- ✓ Checks children's health at **periodic** intervals
- ✓ Provides development, vision, and hearing **screenings** to detect problems
- ✓ Performs **diagnostic** tests to identify risks
- ✓ Provides **treatment** for any problems found

## INVESTING IN NEW YORK'S ECONOMY AND FAMILIES

Medicaid is an economic driver, bringing state tax dollars back home:

Every **\$1** New York invests in Medicaid brings back **\$1.00** in federal funds

### Medicaid strengthens families:

- When parents are covered, they are healthier and better able to care for their children.
- Data show that children are more likely to get and keep health insurance when their parents are covered.
- When parents and children are covered, the whole family is more financially secure.

## AFTER YEARS OF PROGRESS, WE'RE LOSING GROUND

- In 2017, the number of uninsured children **increased** for the first time in a decade. **276,000** more U.S. children became uninsured, and progress in covering New York children stalled.
- In 2018, the number of children enrolled in Medicaid and CHIP **fell by about 840,000** nationwide.

These data show that **children's health coverage is headed in the wrong direction**—an alarming trend that cannot be ignored.

## WE MUST PROTECT CHILDREN'S COVERAGE

### KEEP MEDICAID STRONG

Medicaid faces serious threats in states where enrollment barriers such as work reporting requirements, budget cuts, and moves to block grant or cap Medicaid funding are being proposed. Actions like these prevent Medicaid from doing its job of providing health insurance. We must prevent harmful changes that add costly administrative burden for states while also taking away people's health coverage.

### KEEP CHILDREN COVERED

States have made historic gains in covering children. But, with coverage rates stalling or headed in the wrong direction, we must double down on efforts to reach and enroll eligible children, focus on system improvements to keep them covered, and ensure that parents have health insurance, so they can keep themselves and their families healthy.
